Projects

PingUp – Social Media Application | *MERN Stack* | Live Demo

- Developed a full-stack social media platform using React.js, Node.js, Express.js, and MongoDB with a responsive user interface.
- Built social features including user profiles, follow/unfollow functionality, image sharing, post creation, and like interactions.
- Implemented real-time chat functionality to enable users to communicate and connect with each other.

Eventora – Event Management Application | *MERN Stack* | Live Demo

- Built a full-stack event management platform that allows users to discover, create, and manage events.

Full-Stack E-Commerce Application | *MERN Stack* | Live Demo

- Developed a full-stack e-commerce application using React.js, Node.js, Express.js, and MongoDB.
- Implemented secure JWT-based user and admin authentication with bcrypt password hashing and protected routes.
- Developed product browsing, dynamic product listings, shopping cart management, and order-related functionality.
- Integrated RESTful APIs and MongoDB for efficient product, user, and application data management.
- Used Nodemailer for email notifications and Tailwind CSS to build a responsive and user-friendly interface.
